CEO COMMENTARY

Harris H. Simmons, Chairman and CEO of Zions Bancorporation, commented, "We are pleased with the quarter's financial results. Following several quarters of weak loan demand, we're particularly encouraged by the loan growth we reported during the quarter, which, excluding PPP loans, was 5.6% on an annualized basis. We also reported continued strong deposit growth at an annualized pace of 9.3%. Credit outcomes remained strong, with net recoveries at an annualized 0.01% of total loans, and one of the lowest gross charge-off rates in a number of years. These positive outcomes, together with an improving economic outlook, produced a \$46 million reversal of loss reserves into income."

Mr. Simmons continued, "We're optimistic that, despite lingering supply chain issues and a tight labor market, the economy seems poised for continued growth over the next several quarters as, thanks to a great deal of government stimulus, consumers and most businesses are emerging from the pandemic in relatively strong condition."

OPERATING PERFORMANCE³

¹ Comparisons noted in the bullet points are calculated for the current quarter versus the same prior-year period, unless otherwise specified.

² Adjusted PPNR for the third quarter of 2020 included a one-time \$30 million charitable contribution, and when excluded, PPNR was \$307 million and adjusted PPNR was \$297 million. For information on non-GAAP financial measures, see pages 15-17.

³ Does not include banking premises held for sale.

⁴ EPS calculations assume a 24.5% statutory tax rate.

Comparisons noted in the sections below are calculated for the current quarter versus the same prior-year period, unless otherwise specified. Growth rates of 100% or more are considered not meaningful (“NM”) as they are generally reflective of a low initial starting point.

¹ Rates are calculated using amounts in thousands and taxable-equivalent rates are used where applicable.

Net interest income remained stable at \$555 million in the third quarter of 2021. Total interest income decreased \$12 million, or 2%, primarily due to a \$21 million decrease in interest and fees on loans, partially offset by a \$5 million increase in interest on money market investments, and a \$4 million increase in interest on securities. The decrease in total interest income was primarily attributable to the low interest rate environment. Interest expense decreased \$12 million, or 46%, largely due to an \$11 million decline in interest paid on deposits, which was also attributable to low interest rates.

The net interest margin was 2.68%, compared with 3.06% in the same prior year period. The yield on average interest-earning assets was 2.75% in the third quarter of 2021, a decrease of 45 basis points, compared with the same prior year quarter. Average money market investments, including short-term deposits held at the Federal Reserve, increased to 15.3% of average interest-earning assets, compared with 4.3% in the same prior year period. This increase had a significant dilutive effect on the net interest margin.

Average interest-earning assets included \$3.8 billion of Small Business Administration (“SBA”) Paycheck Protection Program (“PPP”). During the third quarter of 2021, about 19,000 PPP loans, totaling \$1.5 billion, received forgiveness by the SBA. Total interest income from PPP loans was \$63 million during the third quarter of 2021, of which, \$41 million was related to accelerated recognition of net unamortized deferred fees on these loans due to forgiveness. At September 30, 2021, unamortized net origination fees related to the PPP loans totaled approximately \$83 million.

The yield on loans increased 14 basis points from the third quarter of 2020, primarily due to accelerated amortization of deferred fees on forgiven PPP loans. Excluding PPP loans, the yield on loans decreased 18 basis points from the third quarter of 2020. The yield on non-PPP loans originated during the third quarter of 2021 was moderately less than the yield on loans maturing or otherwise paying down. The yield on securities decreased 41 basis points from the third quarter of 2020, primarily due to lower yields on re-investment of principal payments and other purchases throughout the previous four quarters.

The annualized cost of total deposits for the third quarter of 2021 was 0.03%, compared with 0.11% for the third quarter of 2020. The rate paid on total deposits and interest-bearing liabilities was 0.07%, a decrease from 0.15% during the third quarter of 2020, which was primarily due to low deposit rates and strong noninterest bearing deposit growth. Average noninterest bearing deposits as a percentage of total deposits were 50% for the third quarter of 2021, compared with 46% for the same prior year period.

Total customer-related fees increased \$12 million to \$151 million from the prior year quarter, primarily due to improved customer transaction volume, new client activity, and deepening of existing client relationships. Loan-related fees and income decreased \$5 million, primarily due to a decline in our residential mortgage originations held for sale.

Securities gains and losses decreased \$27 million from the third quarter of 2020, largely as a result of a \$28 million unrealized loss (compared with a \$63 million unrealized gain in the second quarter of 2021) relating to our SBIC investment in Recursion Pharmaceuticals, Inc. This investment will continue to be marked-to-market until the SBIC fund manager divests of the shares, which are subject to a minimum 180-day lock-up period from the initial offering in April 2021. During the second quarter of 2021, we accrued an associated success fee of \$9 million in other noninterest expense, and reversed \$4 million of this accrual during the current quarter based on the fair value of the investment.

We recognized a \$2 million gain related to a credit valuation adjustment (“CVA”) on client-related interest rate swaps, compared with a \$8 million CVA gain in the third quarter of 2020. The CVA gain for the current quarter was primarily due to improvements in the credit quality of our clients with interest rate swaps, as well as changes in interest rates, which decreased the value of, and our credit exposure to, the client-related interest rate swaps.

¹ For information on non-GAAP financial measures, see pages 15-17.

Noninterest expense declined \$13 million, when compared with the third quarter of 2020. The decline was largely attributable to a \$28 million decrease in other noninterest expense that was primarily due to a \$30 million donation to our charitable foundation during the third quarter of 2020, which was related to the origination fees earned on PPP loans. Salaries and benefits expense increased \$16 million, or 6%, primarily due to higher incentive compensation and profit sharing as a result of improved profitability. Professional and legal services expense increased \$4 million, or 33%, mainly due to various technology-related and other outsourced services.

Adjusted noninterest expense decreased \$8 million, or 2%, to \$432 million, compared with \$440 million for the same prior year quarter, primarily due to the decrease in other noninterest expense previously discussed. The efficiency ratio was 59.8%, compared with 62.2% for the third quarter of 2020. For information on non-GAAP financial measures, including differences between noninterest expense and adjusted noninterest expense, see pages 15-17.

¹ Does not include loans held for sale.

² Does not include banking premises held for sale.

Net loan and lease recoveries were \$1 million in the third quarter of 2021, compared with net charge-offs of \$52 million in the prior year quarter. The ratio of nonaccrual loans and accruing loans past due 90 days or more to loans and leases (ex-PPP) was 0.69%, compared with 0.78% for the third quarter of 2020, and the ratio of classified loans to total loans and leases (ex-PPP) was 2.9%, compared with 3.4%, for the prior year quarter.

We recorded a negative \$46 million provision for credit losses, compared with a positive \$55 million provision for the third quarter of 2020. The allowance for credit losses (“ACL”) was \$529 million at September 30, 2021, compared with \$917 million at September 30, 2020. The decrease in the ACL was due largely to improvements in economic forecasts and credit quality, compared with the economic stress caused by the COVID-19 pandemic in the prior year period. The ratio of total ACL to total loans and leases (ex-PPP) was 1.11% at September 30, 2021, compared with 1.91% at September 30, 2020.

Unfunded lending commitments and letters of credit	\$ 26,138	\$ 25,689	\$ 24,845	\$ 449	2	\$ 1,293	5

Loans and leases, net of unearned income and fees, decreased \$4.1 billion, or 7%, to \$50.7 billion at September 30, 2021, from \$54.7 billion at September 30, 2020, primarily due to the forgiveness of PPP loans. Excluding PPP loans, total loans and leases decreased \$0.3 billion, or 1%, to \$47.6 billion at September 30, 2021. Within commercial loans, a \$0.7 billion increase in municipal loans and a \$0.3 billion increase in owner occupied loans were partially offset by a \$0.3 billion decrease in commercial and industrial loans. Commercial real estate construction and land development loans increased \$0.5 billion. Consumer 1-4 family residential mortgage loans decreased \$1.1 billion, primarily due to continued refinancing activity. Unfunded lending commitments and letters of credit increased \$1.3 billion, or 5%, to \$26.1 billion at September 30, 2021, primarily due to growth in our home equity credit line and commercial and industrial loan portfolios as well as a decrease in commitment utilization.

Total borrowed funds	\$ 1,599	\$ 2,049	\$ 2,599	\$ (450)	(22)	\$ (1,000)	(38)

Total deposits increased \$10.8 billion, or 16%, to \$77.9 billion at September 30, 2021, primarily due to a \$7.8 billion increase in noninterest-bearing deposits. Average total deposits increased to \$77.4 billion, compared with \$66.5 billion for the third quarter of 2020. Average noninterest-bearing deposits increased 24% to \$38.3 billion, from \$30.8 billion for the prior year quarter, and were 50% and 46% of average total deposits, respectively, for the same periods.

Total borrowed funds decreased \$1.0 billion, or 38%, to \$1.6 billion at September 30, 2021. Average borrowed funds decreased to \$1.8 billion, compared with \$2.4 billion for the prior year quarter. The decrease in long-term debt was primarily due to the maturity of \$281 million of 3-year, 3.50% senior notes during the current quarter. The decrease in overall borrowed funds continues to reflect less reliance on federal funds purchased and other short-term borrowings due to strong deposit growth, which significantly exceeded earning asset growth over this period.

During the third quarter of 2021, the common stock dividend increased to \$0.38 per share, from \$0.34 during the prior year quarter. Weighted average diluted shares outstanding decreased 3.3 million from the third quarter of 2020, primarily due to share repurchases. During the third quarter of 2021, we repurchased 5.8 million common shares outstanding for \$325 million, which is equivalent to 3.6% of common stock outstanding as of June 30, 2021.

Preferred stock decreased \$126 million due to the redemption of the outstanding shares of our 5.75% Series H Non-Cumulative Perpetual Preferred Stock at par value during the second quarter of 2021. Accumulated other comprehensive income decreased \$268 million to \$64 million at September 30, 2021, primarily due to decreases in the fair value of available-for-sale securities as a result of changes in interest rates.

Tangible book value per common share increased to \$40.37 at September 30, 2021, compared with \$37.11 at September 30, 2020. Basel III common equity tier 1 ("CET1") capital was \$6.2 billion at September 30, 2021 and \$5.8 billion at September 30, 2020. The estimated Basel III CET1 capital ratio was 10.9% at September 30, 2021, compared with 10.4% at September 30, 2020. For information on non-GAAP financial measures, see pages 15-17.

GAAP to Non-GAAP Reconciliations

(Unaudited)

This press release presents non-GAAP financial measures, in addition to GAAP financial measures, to provide investors with additional information. The adjustments to reconcile from the applicable GAAP financial measures to the non-GAAP financial measures are presented in the following schedules. We consider these adjustments to be relevant to ongoing operating results and to provide a meaningful base for period-to-period and company-to-company comparisons. We use these non-GAAP financial measures to assess our performance, financial position, and for presentations of our performance to investors. We believe that presenting these non-GAAP financial measures permits investors to assess our performance on the same basis as that applied by our management and the financial services industry.

Non-GAAP financial measures have inherent limitations and are not necessarily comparable to similar capital measures that may be presented by other financial services companies. Although non-GAAP financial measures are frequently used by stakeholders to evaluate a company, they have limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of results reported under GAAP.

Tangible Common Equity and Related Measures

Tangible common equity and related measures are non-GAAP measures that exclude the impact of intangible assets and their related amortization. We believe these non-GAAP measures provide useful information about our use of shareholders' equity and provide a basis for evaluating the performance of a business more consistently, whether acquired or developed internally.

Efficiency Ratio and Adjusted Pre-Provision Net Revenue

The efficiency ratio is a measure of operating expense relative to revenue. We believe the efficiency ratio provides useful information regarding the cost of generating revenue. The methodology of determining the efficiency ratio may differ among companies. We make adjustments to exclude certain items that are not generally expected to recur frequently, as identified in the subsequent schedule, which we believe allow for more consistent comparability among periods. Adjusted noninterest expense provides a measure as to how well we are managing our expenses; adjusted pre-provision net revenue (“PPNR”) enables management and others to assess our ability to generate capital to cover credit losses through a credit cycle. Taxable-equivalent net interest income allows us to assess the comparability of revenue arising from both taxable and tax-exempt sources.

¹ The success fee accrual is associated with the unrealized gain/(loss) from our SBIC investment in Recursion Pharmaceuticals, Inc., and is adjusted based on the mark-to-market value of the investment. The unrealized gain/(loss) is excluded from the efficiency ratio through securities gains (losses), net.

² Excluding the \$30 million charitable contribution, the efficiency ratio for the three months ended September 30, 2020 would have been 58.0%.
