CEO COMMENTARY

Harris H. Simmons, Chairman and CEO of Zions Bancorporation, commented, "Our third quarter results continued to demonstrate the positive impact of solid loan growth and moderately higher interest rates, as our net interest margin strengthened to 3.24%, up from 2.68% a year ago, producing strong adjusted pre-provision net revenue (PPNR) growth and positive operating leverage."

Mr. Simmons continued, "Strong PPNR growth was offset by a higher provision for credit losses. Despite material improvements in most of our credit quality metrics relative to both last quarter and last year, we boosted our loan loss reserve to reflect both loan growth and a heightened probability of economic recession in the coming year."

Notwithstanding a \$57 million decrease in interest income from PPP loans, net interest income increased \$108 million, or 19%, to \$663 million in the third quarter of 2022, primarily due to a higher interest rate environment and a favorable change in the composition of interest-earning assets.

Average interest-earning assets decreased \$0.7 billion, or 1%, from the prior year quarter, driven by significant declines in average money market investments and PPP loans, the effects of which were largely offset by strong growth in average available-for-sale securities and average loans and leases (ex-PPP). Average money market investments declined \$9.0 billion and average PPP loans decreased \$3.4 billion. Average securities increased \$6.2 billion, representing 31% of average interest-earning assets, compared with 24%, and average loans and leases (ex-PPP) increased \$5.5 billion.

The net interest margin was 3.24%, compared with 2.68%. The yield on average interest-earning assets was 3.45% in the third quarter of 2022, an increase of 70 basis points. The yield on total loans increased 35 basis points to 4.17%, the yield on non-PPP loans increased 57 basis points to 4.16%, and the yield on securities increased 47 basis points to 2.10%, all reflecting the higher interest rate environment.

The cost of total deposits for the third quarter of 2022 was 0.10%, compared with 0.03%. The rate paid on total deposits and interest-bearing liabilities was 0.22%, compared with 0.07%. Average noninterest-bearing deposits as a percentage of total deposits were 51%, up slightly from the same prior year period.

In the third quarter of 2022, more than 1,000 PPP loans totaling \$0.2 billion were forgiven by the SBA. PPP loans contributed \$6 million in interest income during the quarter, compared with \$63 million. During the same time periods, approximately \$4 million and \$41 million of the interest income from PPP loans was related to accelerated recognition of net unamortized deferred fees due to forgiveness, respectively. At September 30, 2022, the remaining net unamortized deferred fees on PPP loans totaled \$5 million.

Total customer-related noninterest income increased \$5 million, or 3%, driven by increases in capital markets and foreign exchange fees, commercial account fees, card fees, and wealth management fees. Capital markets and foreign exchange fees benefited from improved customer swap, foreign exchange, and syndication activity. These increases were partially offset by a decrease in loan-related fees, primarily due to a decline in our residential mortgages held for sale, and a decrease in retail and business banking fees. The latter decrease was due largely to a previously disclosed change in our overdraft and non-sufficient funds practices, which was effected early in the third quarter of 2022.

Net securities gains and losses increased \$29 million, due largely to unrealized losses recorded during the prior year period related to our SBIC investment in Recursion Pharmaceuticals, Inc. Dividends and other income (loss) decreased \$10 million from the prior year period, primarily due to a \$6 million valuation loss recognized on one of our equity investments in the current period.

¹ For information on non-GAAP financial measures, see pages 15-17.

Total noninterest expense increased \$50 million, or 12%, relative to the prior year quarter. Salaries and benefits expense increased \$27 million, or 9%, due to the impact of inflationary and competitive labor market pressures on wages and benefits, increased headcount, and increased incentive compensation accruals arising from improvements in anticipated full-year profitability.

Other noninterest expense increased \$14 million, primarily due to the reversal of a success fee accrual in the prior year period related to our SBIC investment in Recursion Pharmaceuticals, Inc., as well as increased travel and certain other expenses incurred during the current period. Deposit insurance and regulatory expense increased \$5 million, driven largely by a higher FDIC insurance assessment resulting from changes in the balance sheet composition.

Professional and legal services expense decreased \$3 million, or 18%, due to third-party assistance associated with PPP loan forgiveness and other technology-related and outsourced services utilized in the prior year period.

The efficiency ratio was 57.6%, compared with 59.8%, as growth in net revenue outpaced growth in noninterest expense. For information on non-GAAP financial measures, including differences between noninterest expense and adjusted noninterest expense, see pages 15-17.

Loans and leases, net of unearned income and fees, increased \$3.2 billion, or 6%, to \$53.9 billion at September 30, 2022. Excluding PPP loans, total loans and leases increased \$6.0 billion, or 13%, to \$53.6 billion. Commercial and industrial loans, owner occupied loans, and municipal loans increased \$2.4 billion, \$0.8 billion, and \$0.8 billion, respectively. The consumer 1-4 family residential mortgage loan portfolio increased \$0.7 billion, and home equity credit lines increased \$0.5 billion.

Unfunded lending commitments increased \$3.6 billion, or 14%, to \$29.8 billion at September 30, 2022, primarily due to growth in home equity and consumer one-time close construction lending commitments.

Nonperforming assets decreased \$173 million, or 53%, and classified loans decreased \$432 million, or 31%. Net loan and lease charge-offs were \$27 million, compared with net recoveries of \$1 million in the prior year quarter. During the third quarter of 2022, we recorded a \$71 million provision for credit losses, compared with a \$(46) million provision during the prior year period. The allowance for credit losses (“ACL”) was \$590 million at September 30, 2022, compared with \$529 million at September 30, 2021. The increase in the ACL was primarily due to growth in the loan portfolio. The ratio of ACL to total loans and leases (ex-PPP) was 1.10% at September 30, 2022, compared with 1.11% at September 30, 2021.

Total borrowed funds	<u>\$ 6,010</u>	<u>\$ 1,689</u>	<u>\$ 1,599</u>	<u>\$ 4,321</u>	NM	<u>\$ 4,411</u>	NM

Total deposits decreased \$1.9 billion, or 2%, primarily due to a \$1.7 billion, or 4%, decrease in savings and money market deposits. Total deposits at September 30, 2022 included approximately \$400 million of deposit balances acquired from the purchase of three Northern Nevada branches during the third quarter of 2022. Our loan-to-deposit ratio was 71%, compared with 65% in the prior year quarter, which continues to afford us flexibility in managing our funding costs.

Average total deposits remained relatively flat at \$77.5 billion, compared with the prior year period. Average noninterest-bearing deposits increased \$1.3 billion, or 3%, and were 51% and 50% of average total deposits for the respective time periods.

Total borrowed funds increased \$4.4 billion from the prior year quarter, driven by increases in short-term borrowings as a result of significant loan growth and declines in interest-bearing deposits. The decrease in long-term debt was primarily due to the redemption and maturity of senior notes during the past year.

The common stock dividend was \$0.41 per share, compared with \$0.38 per share during the prior year quarter. Common shares outstanding decreased 6.9 million, or 4%, from the third quarter of 2021, primarily due to common stock repurchases. During the third quarter of 2022, we repurchased 0.9 million common shares outstanding for \$50 million.

Accumulated other comprehensive income ("AOCI") decreased to a loss of \$3.1 billion at September 30, 2022, due to decreases in the fair value of fixed-rate available-for-sale securities as a result of changes in interest rates. Absent any sales or credit impairment of these securities, the unrealized losses will not be recognized in earnings. We do not intend to sell any securities with unrealized losses. Additionally, changes in AOCI do not impact our regulatory capital ratios.

Estimated common equity tier 1 ("CET1") capital was \$6.3 billion, compared with \$6.2 billion, and the estimated CET1 capital ratio was 9.6%, compared with 10.9%, driven by the increase in risk-weighted assets due to strong loan growth. Tangible book value per common share decreased to \$21.54, compared with \$40.37, primarily due to the decrease in AOCI previously described.

Supplemental Presentation and Conference Call

GAAP to NON-GAAP RECONCILIATIONS

(Unaudited)

This press release presents non-GAAP financial measures, in addition to GAAP financial measures, to provide investors with additional information. The adjustments to reconcile from the applicable GAAP financial measures to the non-GAAP financial measures are presented in the following schedules. We consider these adjustments to be relevant to ongoing operating results and provide a meaningful basis for period-to-period comparisons. We use these non-GAAP financial measures to assess our performance, financial position, and for presentations of our performance to investors. We believe that presenting these non-GAAP financial measures permits investors to assess our performance on the same basis as that applied by our management and the financial services industry.

Non-GAAP financial measures have inherent limitations and are not necessarily comparable to similar financial measures that may be presented by other financial services companies. Although non-GAAP financial measures are frequently used by stakeholders to evaluate a company, they have limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of results reported under GAAP.

Tangible Common Equity and Related Measures

Tangible common equity and related measures are non-GAAP measures that exclude the impact of intangible assets and their related amortization. We believe these non-GAAP measures provide useful information about our use of shareholders' equity and provide a basis for evaluating the performance of a business more consistently, whether acquired or developed internally.

Efficiency Ratio and Adjusted Pre-Provision Net Revenue

The efficiency ratio is a measure of operating expense relative to revenue. We believe the efficiency ratio provides useful information regarding the cost of generating revenue. The methodology of determining the efficiency ratio may differ among companies. We make adjustments to exclude certain items that are not generally expected to recur frequently, as identified in the subsequent schedule, which we believe allow for more consistent comparability across periods. Adjusted noninterest expense provides a measure as to how we are managing our expenses; adjusted pre-provision net revenue (“PPNR”) enables management and others to assess our ability to generate capital. Taxable-equivalent net interest income allows us to assess the comparability of revenue arising from both taxable and tax-exempt sources.
